Question

Solve for d.

$$8d - 6d = 10$$

$d =$ [ ]

Correct answer

Question

Solve for m.

$$3m - 3m + 2m = 20$$

$m =$ [ ]

Question

Solve for d.

$$-9d = -8 - 7d$$

$d =$

Question

Solve for k.

$$3k = 9 + 6k$$

$k =$ [ ]

Question

Solve for p.

$$9p - 10 = 7p + 8$$

$p =$ ☐

6 of 70 M.12 Solve equations with variables on both sides ZYL

Question

Solve for c.

$$-2 + 8c = -8 + 9c$$

$c =$ [ ]

5 of 70 M.12 Solve equations with variables on both sides ZYL

Question

Solve for z.

$$8z + 6 = 10z$$

$z =$

Question

Solve for m.

$$7m = 7(2m - 3)$$

$m =$ [ ]

Correct answer

Question

Solve for s.

$$18 = 3(2 + s)$$

$s =$

Question

Solve for h.

$$-4h + 10 = -3h$$

$h =$

Question

How many solutions does this equation have?

$$-3u + 4u = u$$

no solution

one solution

infinitely many solutions

Question

Solve for b.

$$11 = 2(-14 + b) + 7$$

$b =$ ____

Question

Solve for f.

$$4 + 10f = 7(2f - 4)$$

$f =$

Question

How many solutions does this equation have?

$$3 - 6h = {}^{-}6h - 3$$

no solution

one solution

infinitely many solutions

Question

How many solutions does this equation have?

$$10w = -7 + 10w$$

- no solution
- one solution
- infinitely many solutions

14 of 70 M.20 Find the number of solutions XDE

Question

How many solutions does this equation have?

$$5 + 6r = 6r$$

- no solution
- one solution
- infinitely many solutions

Question

Fernando is passionate about movies and dreams of going to film school. His goal for the next year is to watch every movie that won the Academy Award for Best Picture. He's already seen some of them and now plans to watch one per week until he's seen them all.

This table shows the relationship between how long (in weeks) Fernando has followed his plan, x, and the number of Best Picture winners he has seen, y.

x (weeks)	y (Best Picture winners)
9	16
17	24
19	26
28	35

According to the values in the table, do x and y have a proportional relationship?

- yes
- no

Question

Brenda likes to make lemonade using the lemons from her grandmother's tre

There is a proportional relationship between the number of pitchers of lemon wants to make, x, and the number of lemons she needs, y.

x (pitchers)	y (lemons)
4	28
7	49
11	77
12	84

What is the constant of proportionality? Write your answer as a whole numbe

[ ] lemons per pitcher

Question

A witch brewed a magical invisibility potion.

There is a proportional relationship between the amount of potion the witch d
milliliters), x, and the amount of time she is invisible (in minutes), y.

x (milliliters)	y (minutes)
5	50
8	80
9	90
10	100

What is the constant of proportionality? Write your answer as a whole numbe

minutes per milliliter

Question

Bobby is celebrating his sixtieth birthday by vacationing in Europe. He decides to travel around by train, so he can relax and enjoy the scenic views. The cost of a train ride includes a flat fee plus an additional charge per kilometer of the trip.

This table shows the relationship between the distance Bobby travels (in kilometers), x, and the cost of the trip (in euro), y.

x (kilometers)	y (euro)
40	30
60	37
80	44
100	51

According to the values in the table, do x and y have a proportional relationship?

- yes
- no

Question

Janet is excited because her grandfather in New Orleans is going to teach her how to make pralines!

This table shows the relationship between the amount of pecans (in cups) Janet's grandfather uses, x, and the number of pralines he makes, y.

x (cups of pecans)	y (pralines)
3	15
4	20
9	45
10	50

According to the values in the table, do x and y have a proportional relationship?

- yes
- no

Question

Owen's grandparents get him a puppy for his thirteenth birthday, and he names the puppy Penny. Owen does a good job taking care of Penny, and she's growing so fast!

This table shows the relationship between Penny's age (in months), x, and her weight (in pounds), y.

x (months)	y (pounds)
3	13
4	17
8	33
10	41

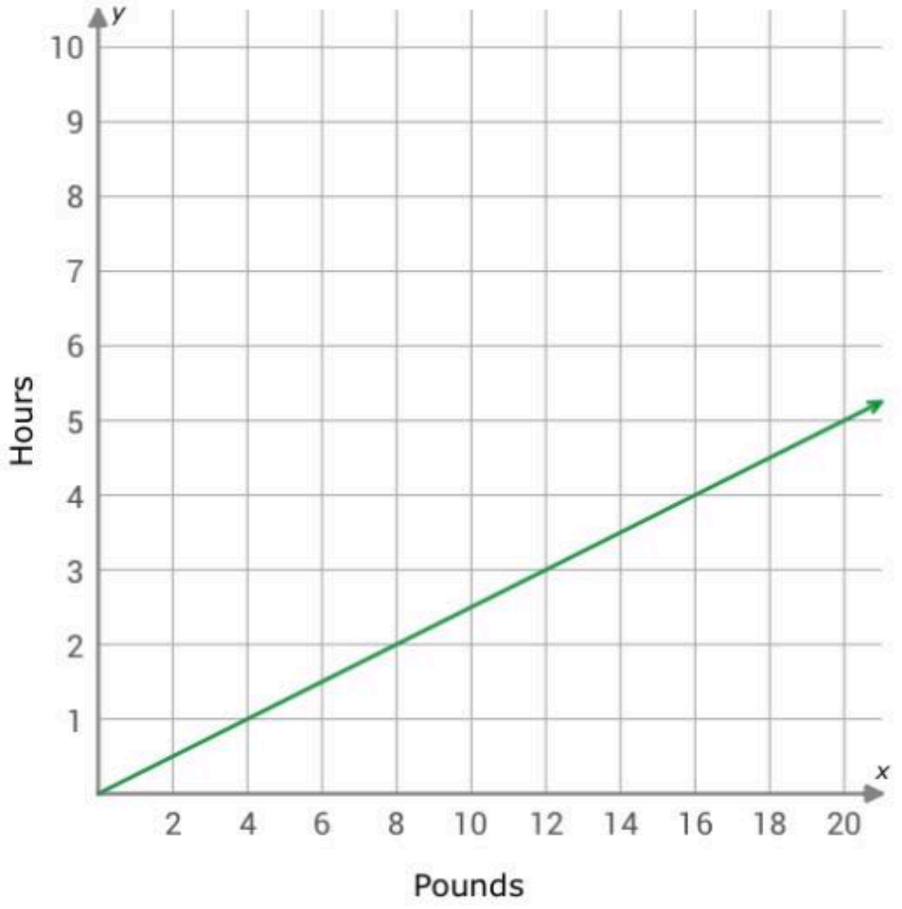

According to the values in the table, do x and y have a proportional relationship?

- yes
- no

Question

Michael has written his own recipe for pot roast.

This graph shows the relationship between the weight (in pounds) of the pot roast, x, and the total cooking time (in hours), y.

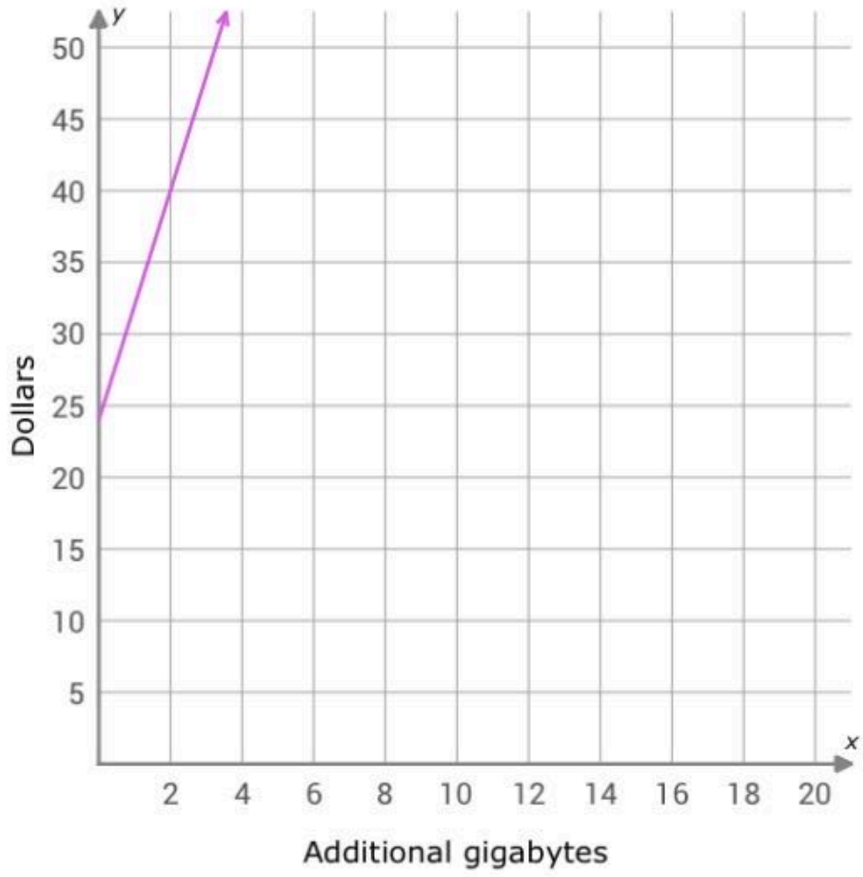

Do x and y have a proportional relationship?

- yes
- no

Question

Susan's smartphone plan with Stark Mobile includes unlimited talk and text and a certain amount of data every month. If she uses additional data, she is charged more on her bill.

This graph shows the relationship between the number of additional gigabytes of data Susan uses in a month, x, and the total amount (in dollars) of her bill, y.

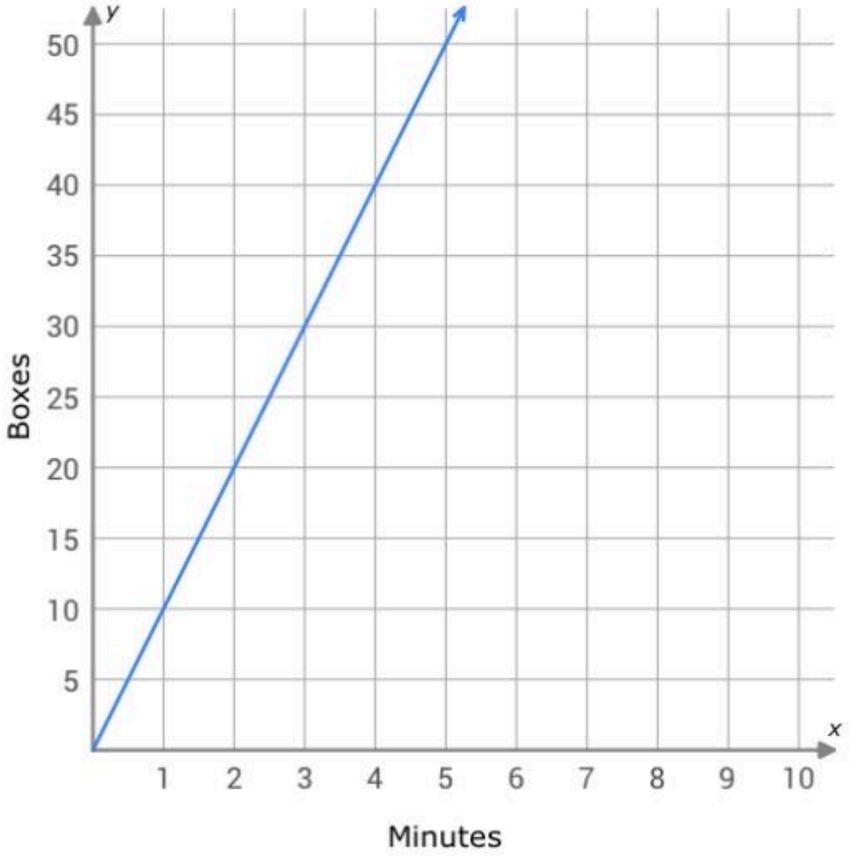

Do x and y have a proportional relationship?

- yes
- no

Question

When a truck full of boxes arrives at the Sparrowtown Post Office, Eve unloads the truck by placing the boxes on a conveyor belt. Eve's coworkers are impressed with how fast Eve does her job.

This graph shows the relationship between the time (in minutes) Eve spends unloading the truck, x, and the number of boxes she unloads from the truck, y.

Do x and y have a proportional relationship?

- yes
- no

Question

Select the equations that show a proportional relationship between x and y.

- $y = 3x$
- $y = 8x$

27 of 70 X.6 Identify proportional relationships from graphs and equations 45N

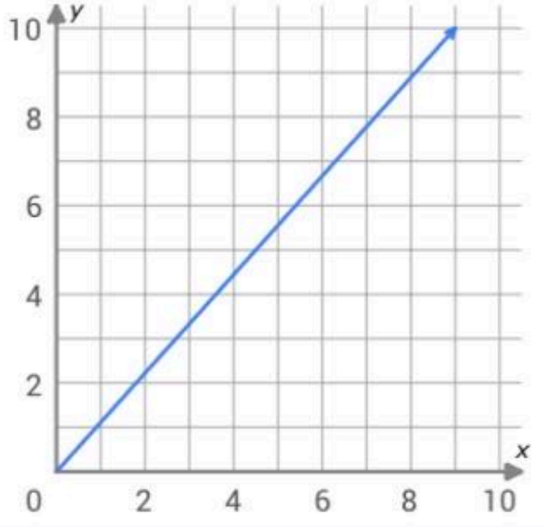

Question

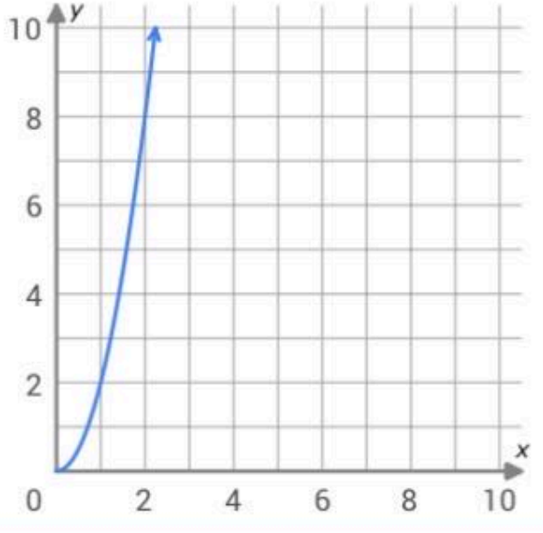

Select the equations that show a proportional relationship between x and y.

- $y = 7x + 9$
- $y = 2x$

Question

Select the graphs that show a proportional relationship between x and y.

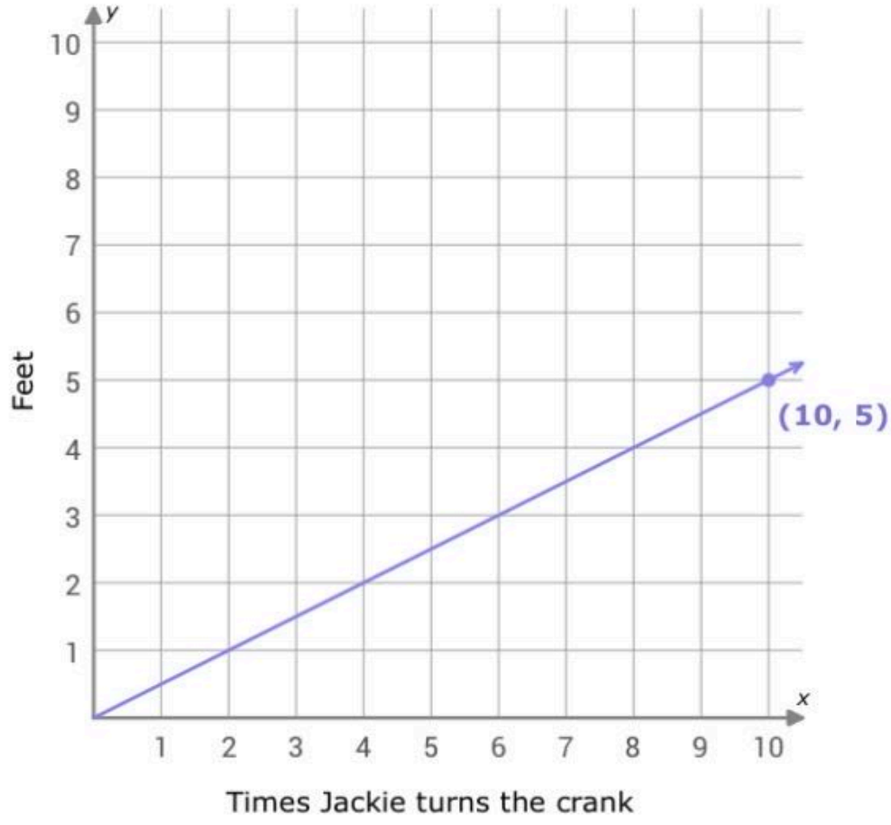

Question

The Picture and Sound electronics store has hired Jackie to work in the warehouse. She uses a pulley with a hand crank to lift heavy boxes.

The graph shows the proportional relationship between the number of times Jackie turns the crank to lift a box, x, and the height the box has been lifted (in feet), y.

What does the point (10, 5) represent?

She turns the crank 5 times to lift a box 10 feet.

She turns the crank 10 times to lift a box 5 feet.

30 of 70 X.7 Identify proportional relationships from tables H8N

Question

Select the tables that show a proportional relationship between x and y.

x	y
2	7
4	10
6	13

x	y
5	2
10	4
15	6

29 of 70 X.7 Identify proportional relationships from tables H8N

Question

Select the tables that show a proportional relationship between x and y.

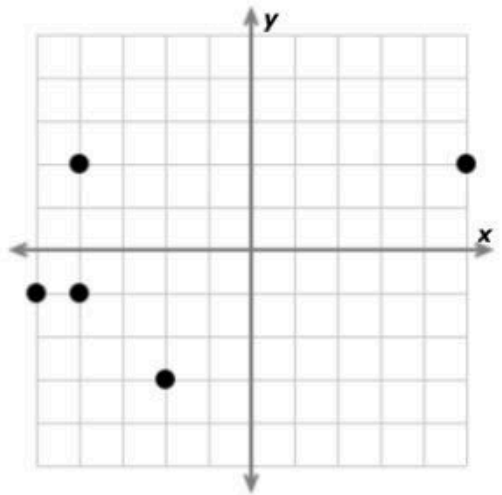

x	y
6	2
12	4
15	5

x	y
1	7
2	10
4	16

34 of 70 BB.1 Identify functions ELJ

Question

Look at this graph:

Is this relation a function?

yes

no

33 of 70 BB.1 Identify functions ELJ

Question

Look at this set of ordered pairs:

(13, 3)
(5, 12)
(6, -14)
(14, 10)

Is this relation a function?

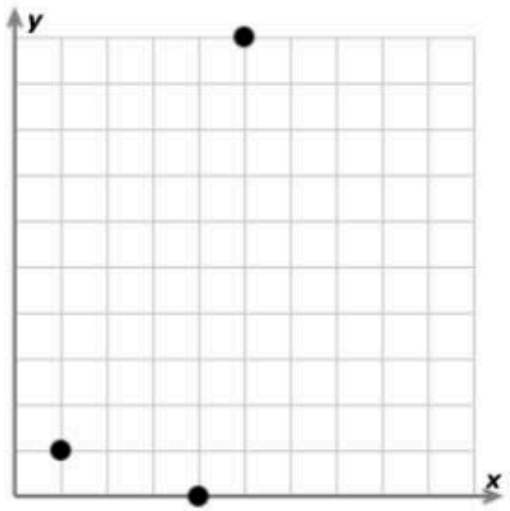

yes

no

32 of 70 BB.1 Identify functions ELJ

Question

Look at this graph:

Is this relation a function?

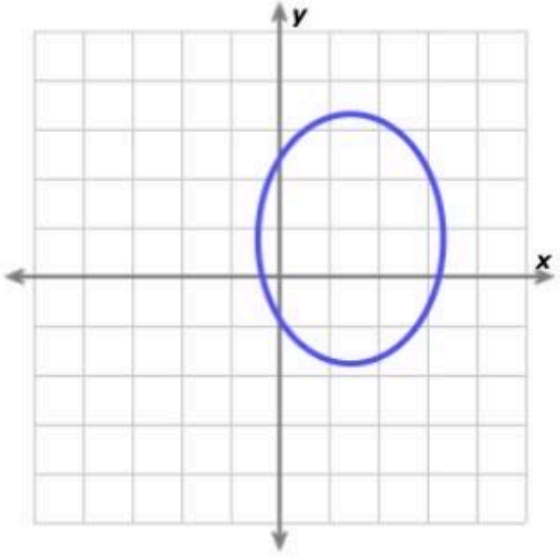

yes

no

37 of 70 BB.2 Identify functions: graphs AEB

Question

Look at this graph:

Is this relation a function?

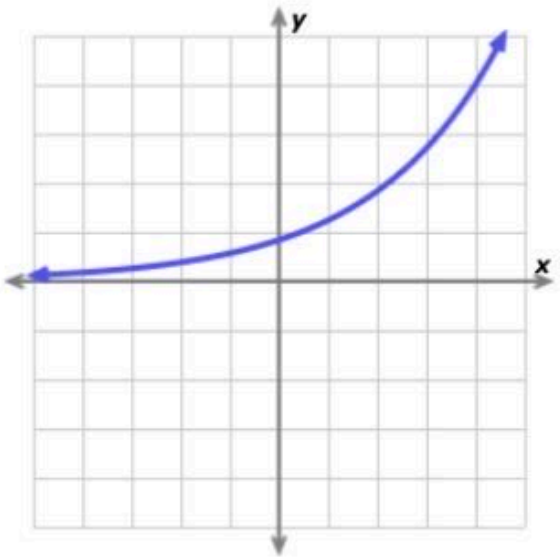

yes

no

36 of 70 BB.2 Identify functions: graphs AEB

Question

Look at this graph:

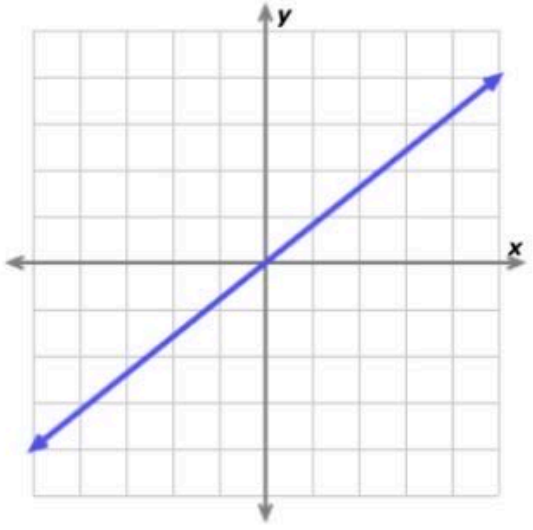

Is this relation a function?

yes

no

Question

Look at this graph:

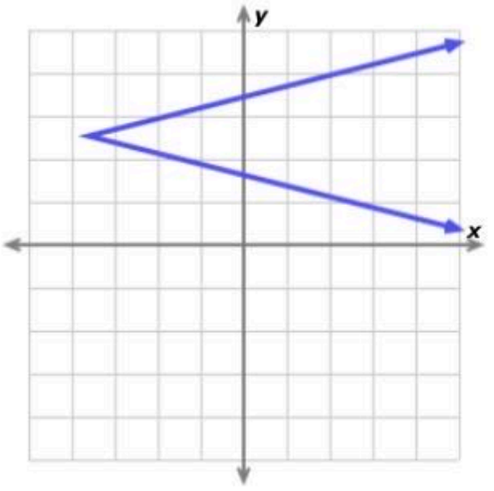

Is this relation a function?

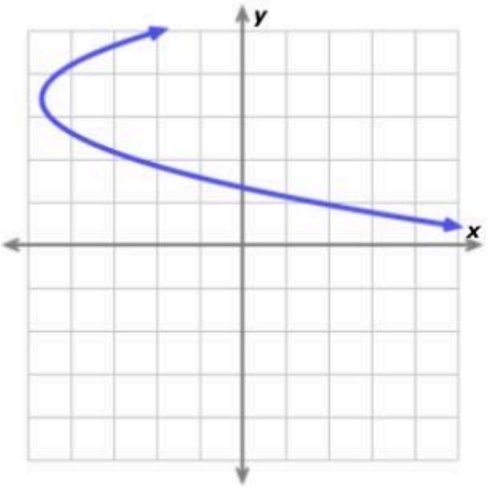

yes

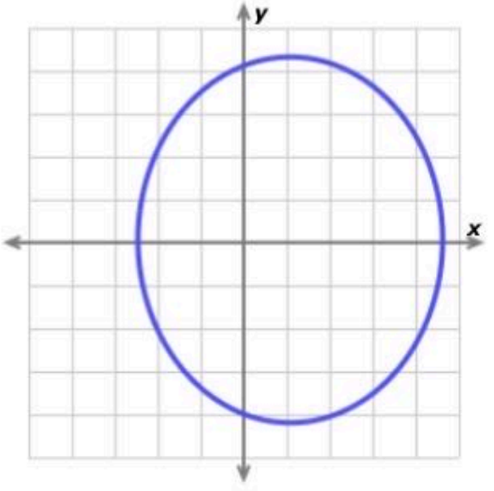

no

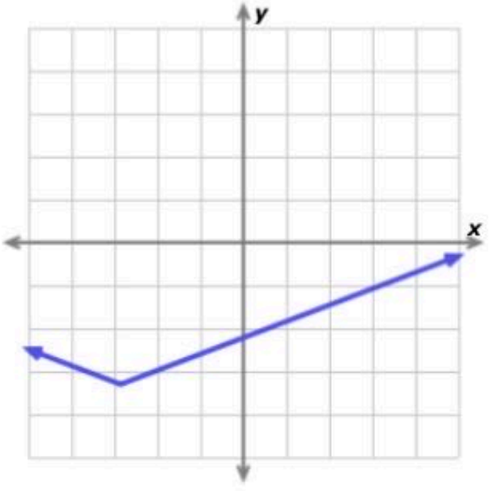

Question

Which of these relations are functions? Select all that apply.

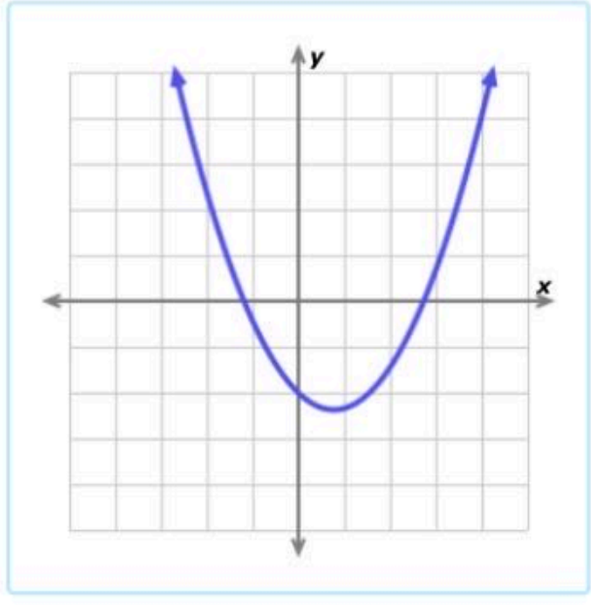

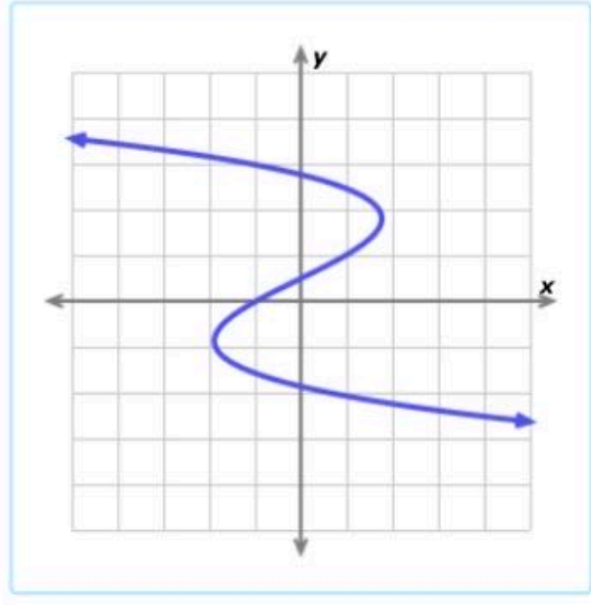

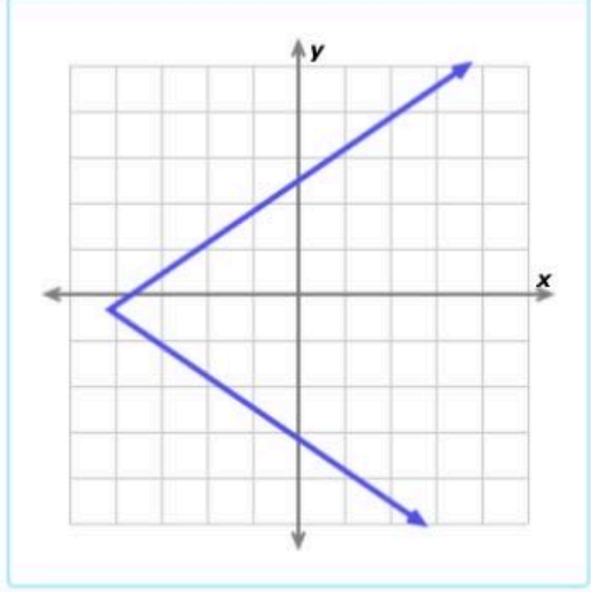

39 of 70 BB.2 Identify functions: graphs AEB

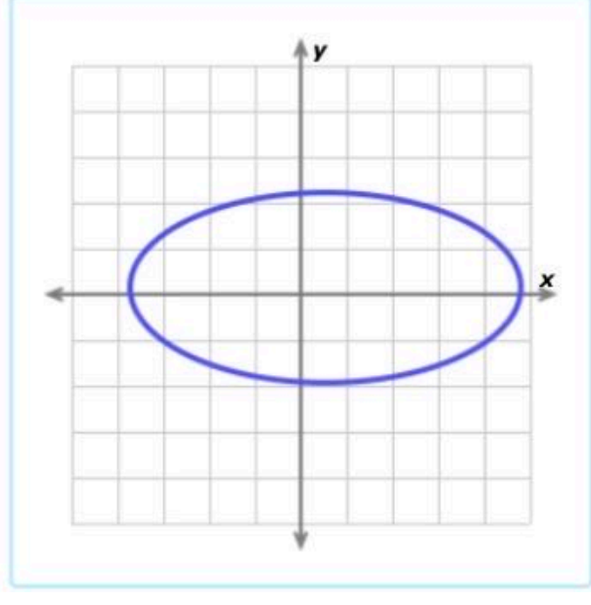

Question

Which of these relations is a function?

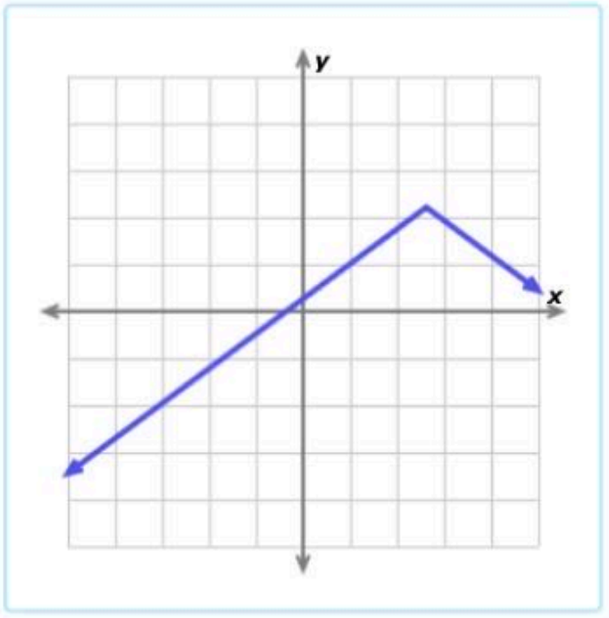

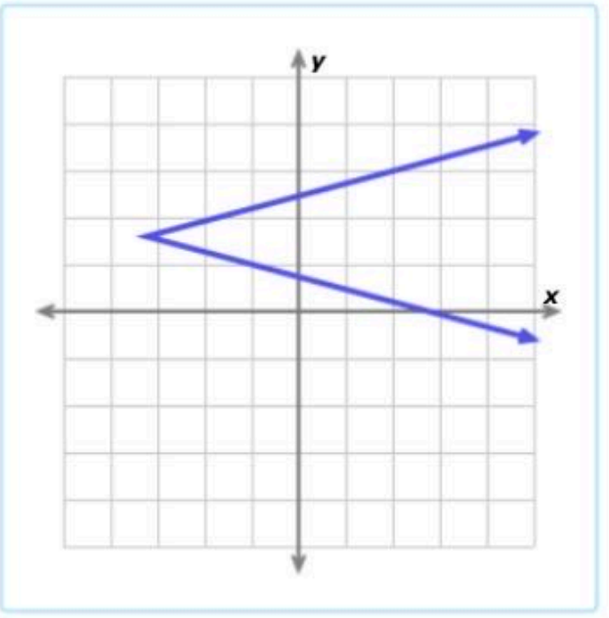

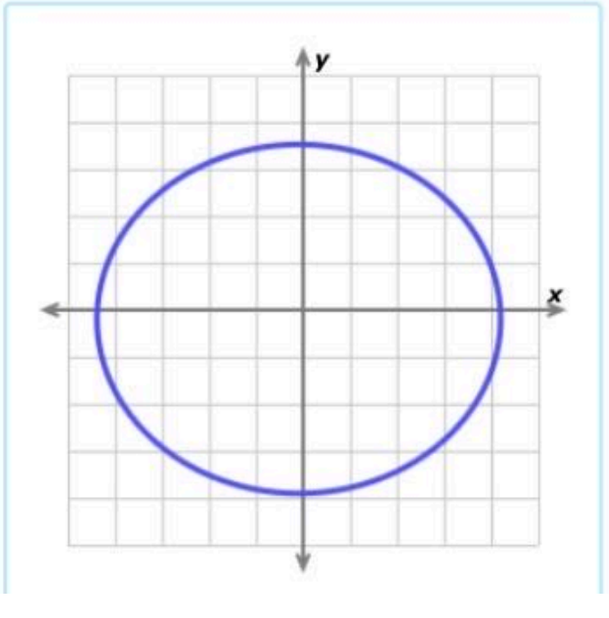

38 of 70 BB.2 Identify functions: graphs AEB

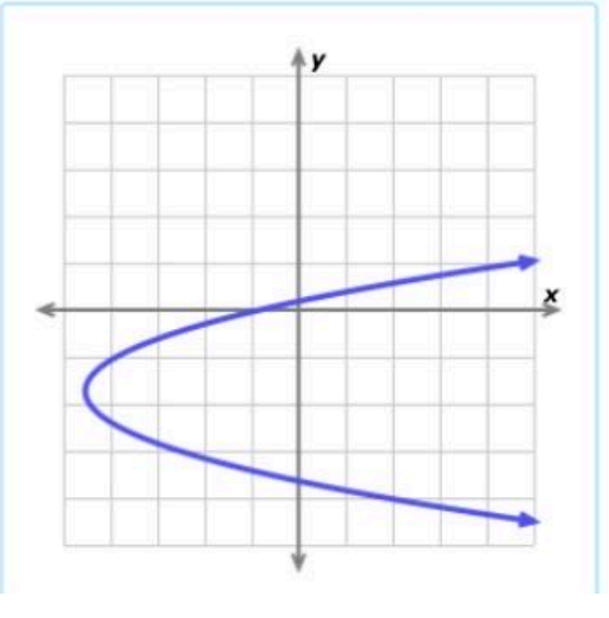

Question

Which of these relations is a function?

Question

What is the domain of this function?

(−10, 4)
(−9, −10)
(−7, 3)
(0, 7)
(3, −1)

{−10, −9, −7, 0, 3}

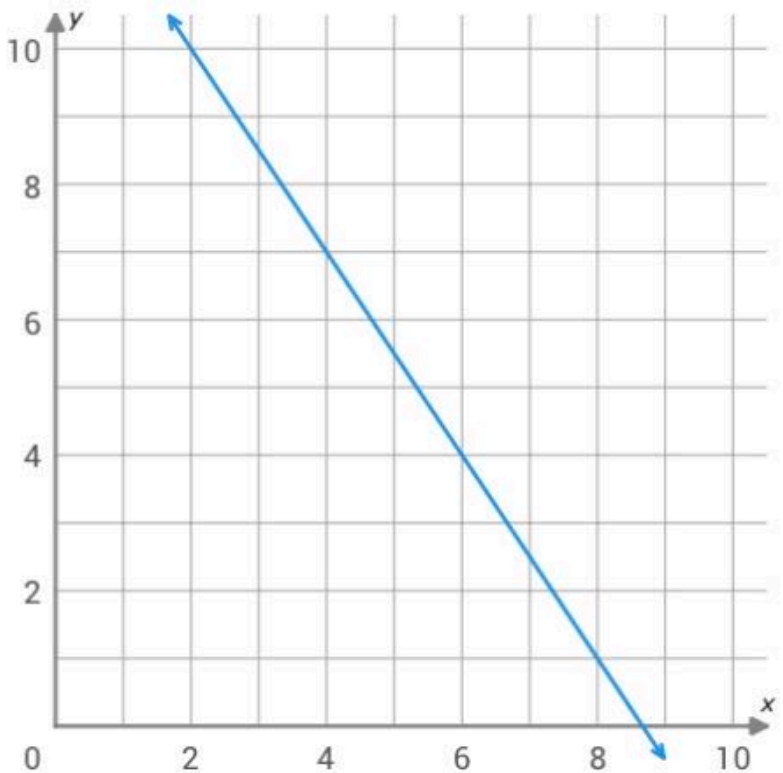

{−10, −9, −7, 3}

{−10, −9, 3, 4, 7}

{−10, −1, 3, 4, 7}

Question

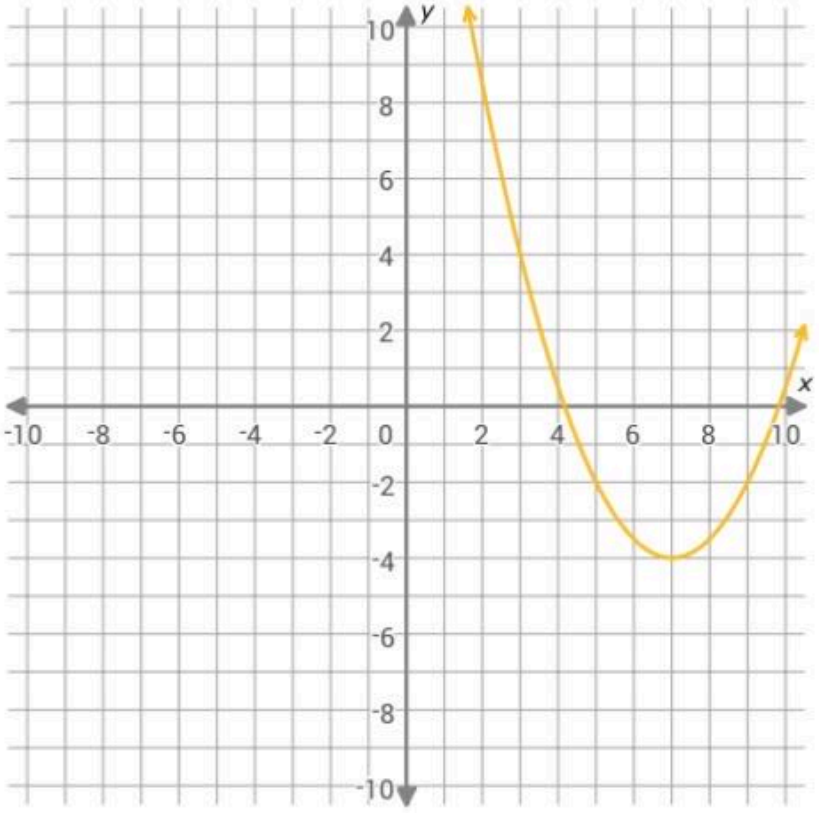

Use the graph of the function to complete the table.

input	output
2	10
4	
8	1

Question

What is the y-value of this function when $x = 5$?

Question

Find the y-intercept of the line $y = 8x + 15$.

Write your answer as an integer or as a simplified proper or improper fraction, not as an ordered pair.

Question

What is the domain of this function?

(−10, 3)
(3, 2)
(0, −8)
(8, −4)
(7, 6)

{2, 3, 4, 6, 8}

{−8, −4, 2, 3, 6}

{0, 3, 7, 8}

{−10, 0, 3, 7, 8}

Question

What is the range of this function?

(0, 3)
(1, 6)
(10, 9)
(−8, −2)
(6, −4)

{−2, 3, 4, 6, 9}

{1, 6, 8, 10}

{−4, −2, 3, 6, 9}

{−8, 0, 1, 6, 10}

Question

Find the slope of the line $y = -x - 3$.

Write your answer as an integer or as a simplified proper or improper fraction.

48 of 70 AA.3 Slope-intercept form: find the slope and y-intercept U55

Question

Find the y-intercept of the line $y = -\frac{8}{7}x - 3$.

Write your answer as an integer or as a simplified proper or improper fraction, not as an ordered pair.

47 of 70 AA.3 Slope-intercept form: find the slope and y-intercept U55

Question

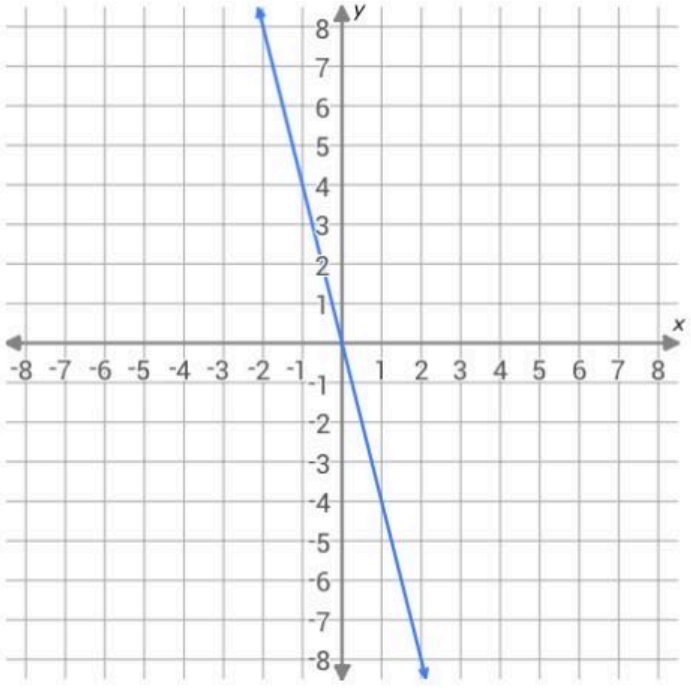

Find the y-intercept of the line $y = \frac{11}{10}x + 6$.

Write your answer as an integer or as a simplified proper or improper fraction, not as an ordered pair.

52 of 70 Z.1 Find the slope from a graph D7M

Question

What is the slope of this line?

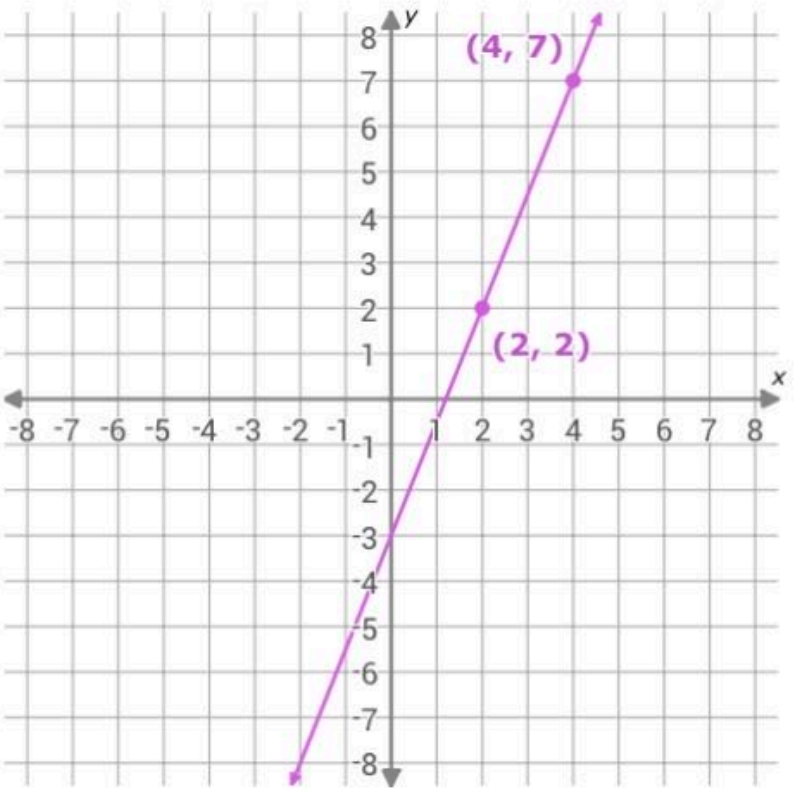

Simplify your answer and write it as a proper fraction, improper fraction, or integer.

51 of 70 Z.1 Find the slope from a graph D7M

Question

What is the slope of this line?

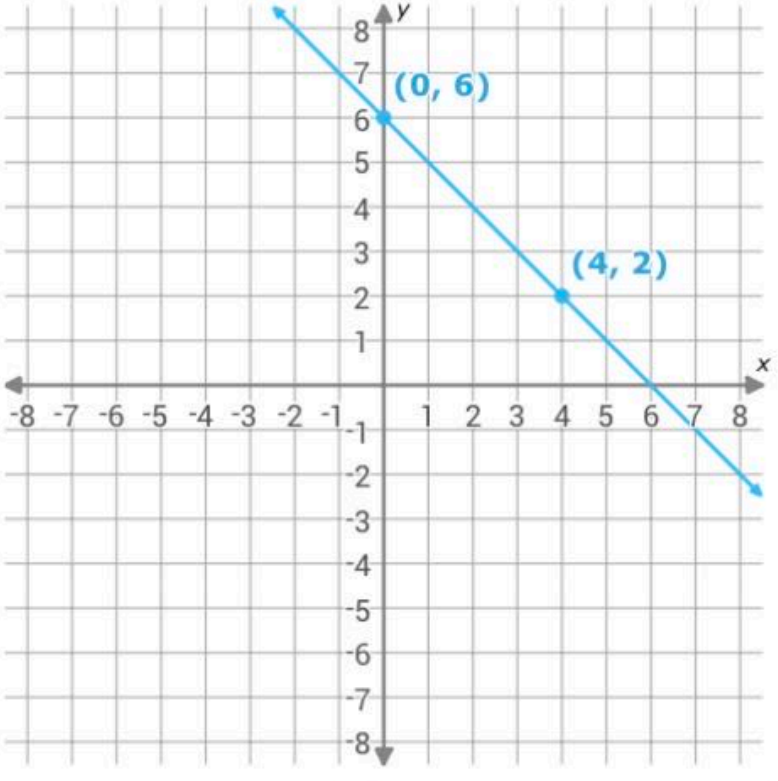

Simplify your answer and write it as a proper fraction, improper fraction, or integer.

Correct answer

50 of 70 Z.1 Find the slope from a graph D7M

Question

What is the slope of this line?

1	−1
0	undefined

Question

Find the slope of the line that passes through (3, 5) and (1, 6).

Simplify your answer and write it as a proper fraction, improper fraction, or integer.

54 of 70 Z.2 Find the slope from two points ZAC

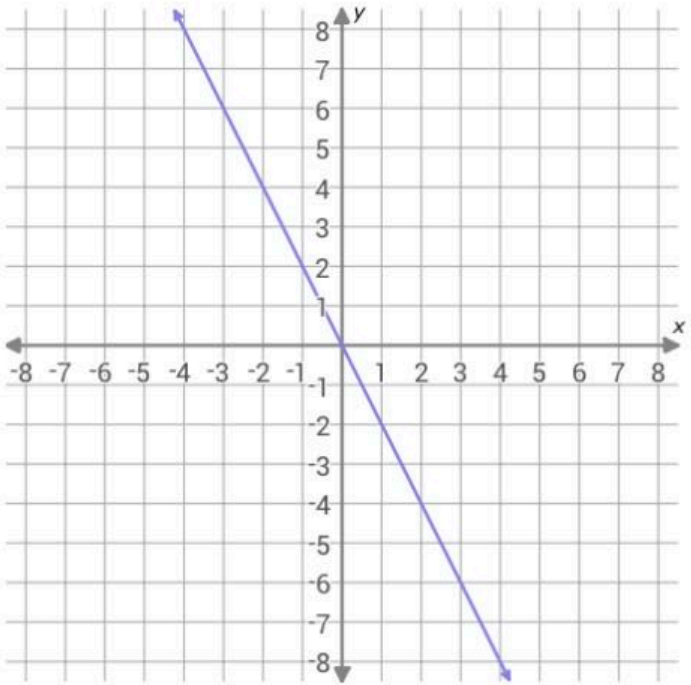

Question

Find the slope of the line that passes through (1, 1) and (6, 10).

Simplify your answer and write it as a proper fraction, improper fraction, or integer.

Question

What is the slope of this line?

Simplify your answer and write it as a proper fraction, improper fraction, or integer.

58 of 70 AA.6 Write a linear equation from a slope and y-intercept WHP

Question

A line has a slope of −7 and a y-intercept of $-\frac{1}{5}$. Write its equation in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

57 of 70 Z.3 Find the slope from a table GSB

Question

A line passes through the points in this table.

x	y
4	-6
5	-3
6	0
7	3

What is the slope of the line?

Write your answer as an integer or simplified fraction.

Correct answer

56 of 70 AA.6 Write a linear equation from a slope and y-intercept WHP

Question

A line has a slope of −9 and a y-intercept of 6. Write its equation in slope-intercept form.

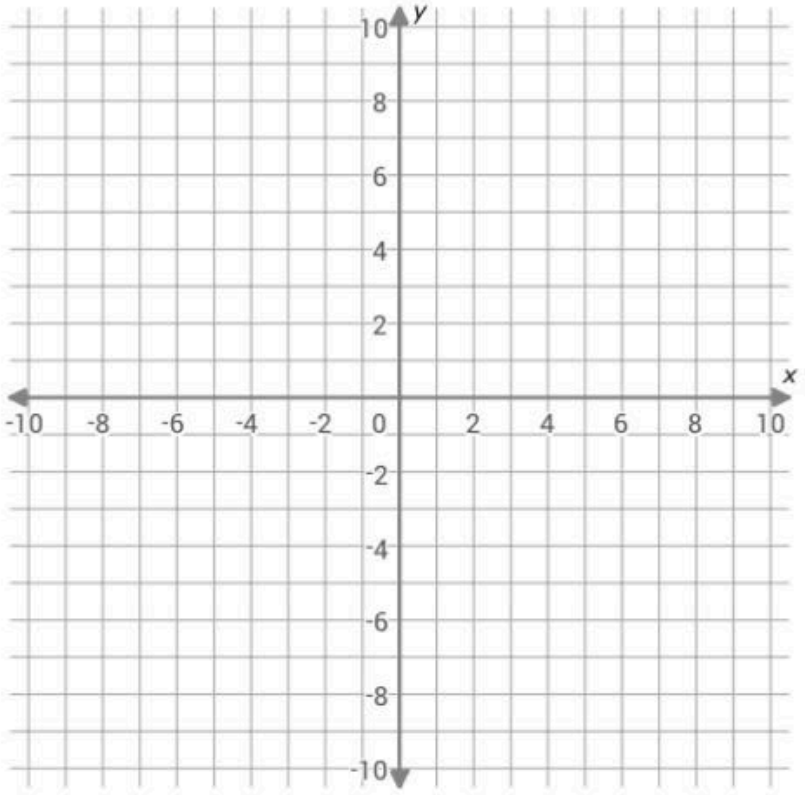

Write your answer using integers, proper fractions, and improper fractions in simplest form.

Question

Graph this line using the slope and y-intercept:

$$y = -\frac{1}{2}x - 1$$

Click to select points on the graph.

60 of 70 AA.6 Write a linear equation from a slope and y-intercept WHP

Question

A line has a slope of −1 and a y-intercept of −20. Write its equation in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

59 of 70 AA.6 Write a linear equation from a slope and y-intercept WHP

Question

A line has a slope of 6 and a y-intercept of -5. Write its equation in slope-intercept form.

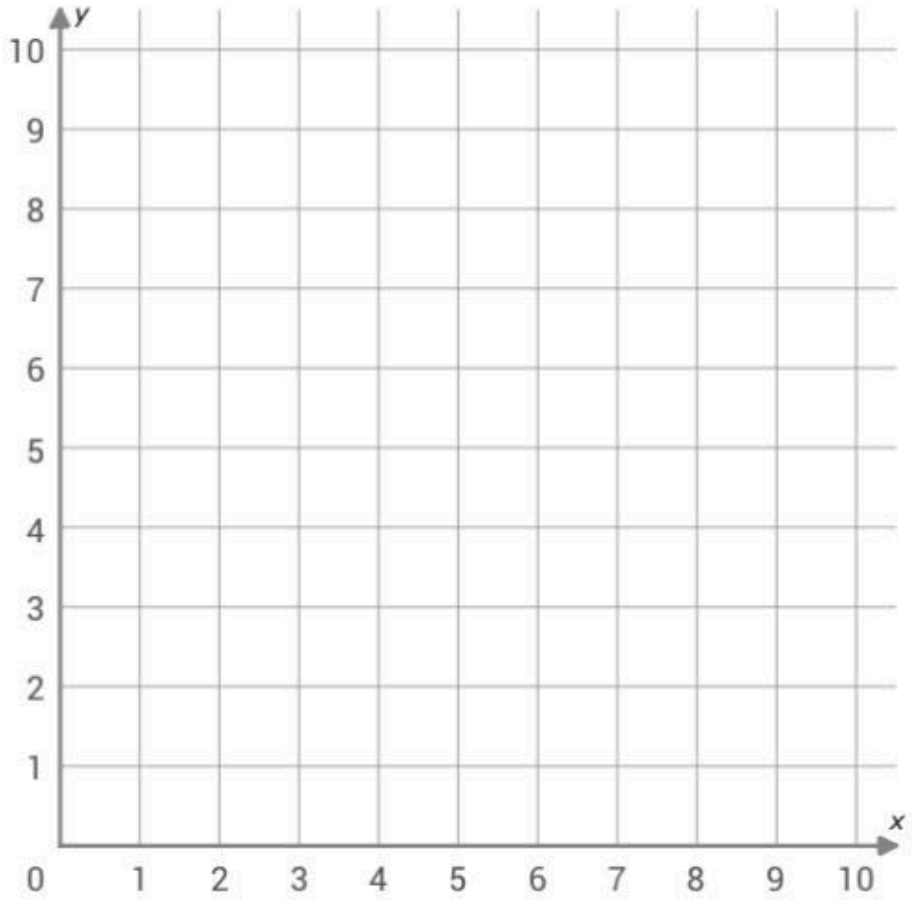

Write your answer using integers, proper fractions, and improper fractions in simplest form.

Question

Graph this line using the slope and *y*-intercept:

$$y = 5x + 1$$

Click to select points on the graph.

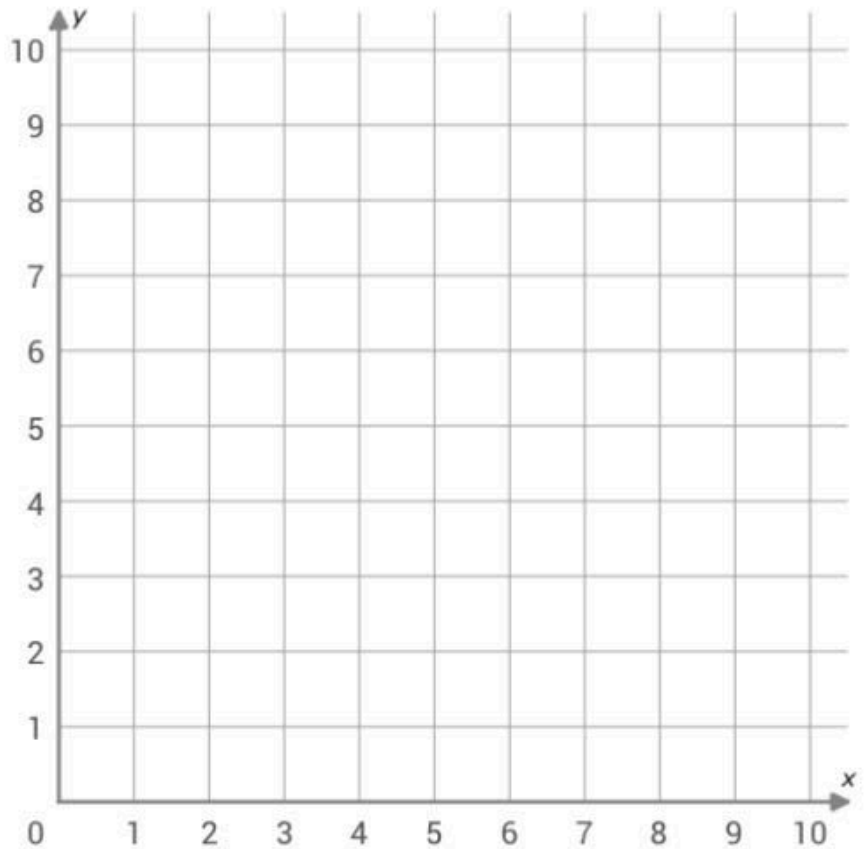

Question

Graph this line using the slope and y-intercept:

$$y = \frac{2}{3}x + 6$$

Click to select points on the graph.

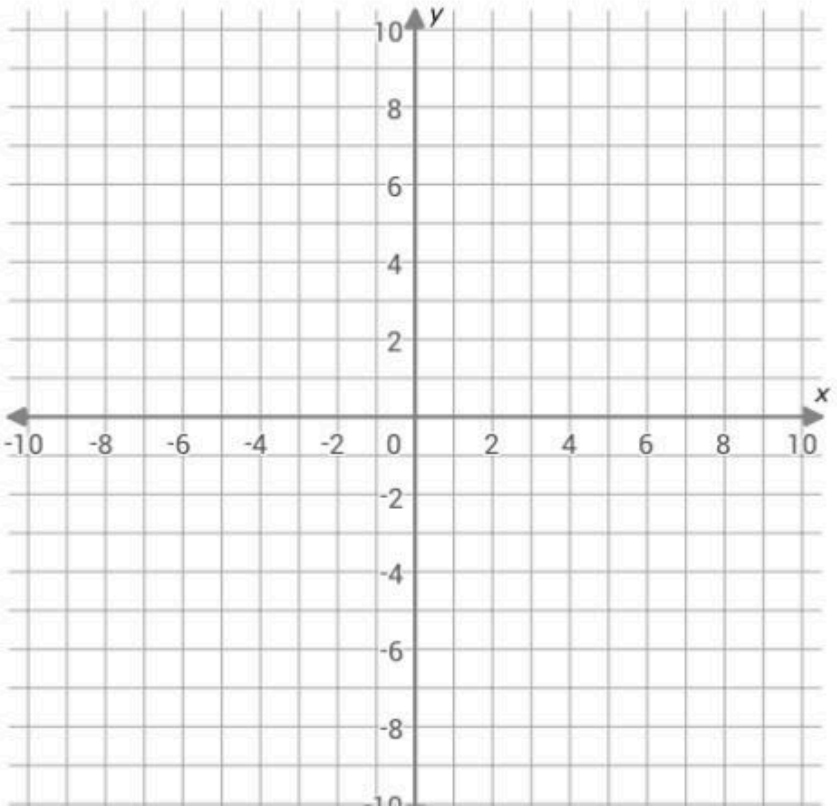

Question

Graph this line using the slope and y-intercept:

$$y = \frac{9}{5}x$$

Click to select points on the graph.

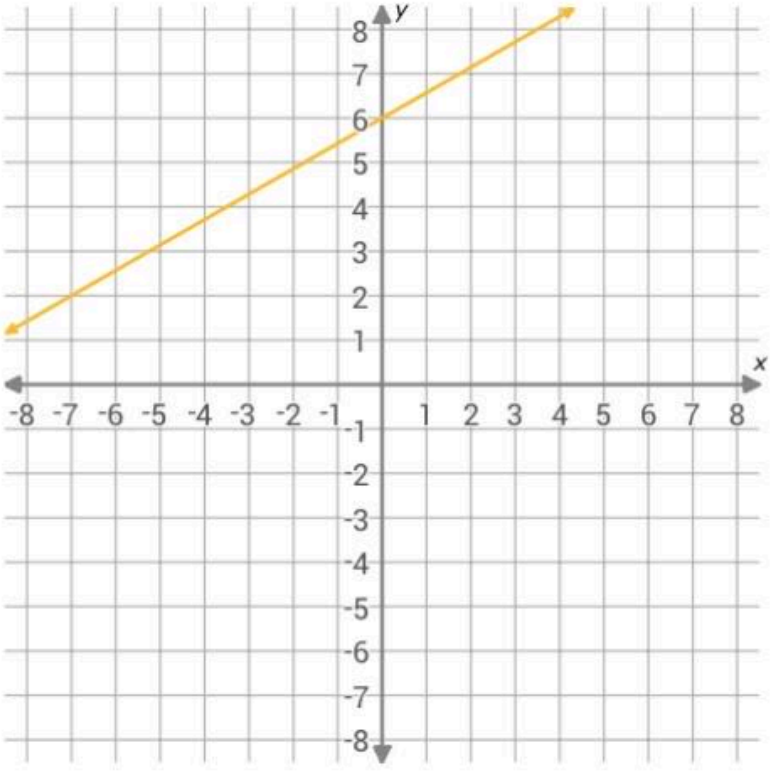

Question

A line passes through the points (−1, −7) and (7, 1). Write its equation in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

Question

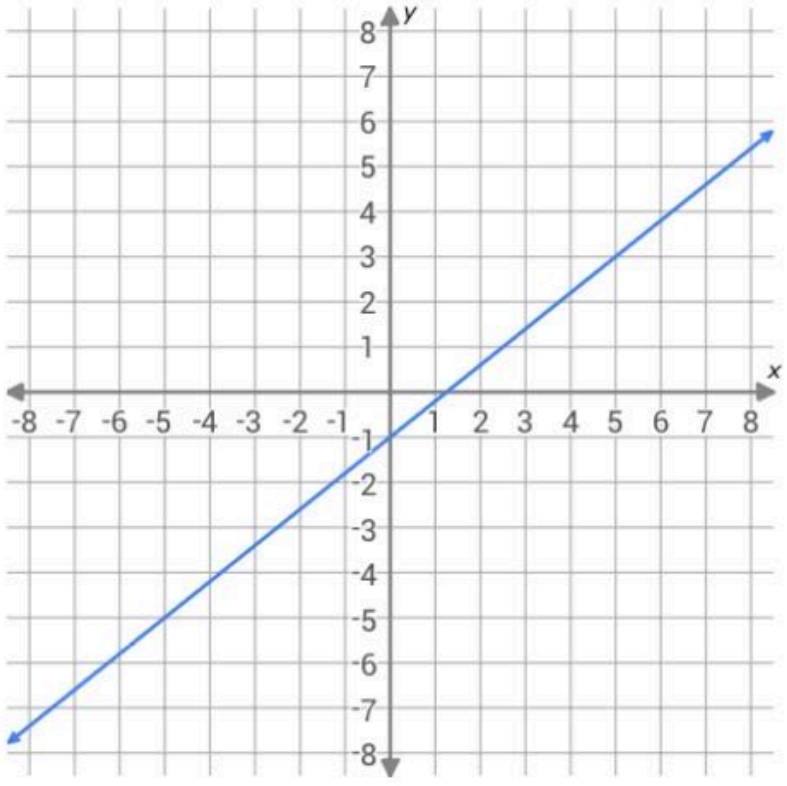

Write the equation of this line in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

Question

Write the equation of this line in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

Question

A line passes through the points (3, 7) and (5, 7). Write its equation in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

69 of 70 AA.9 Write a linear equation from two points 2R9

Question

A line passes through the points (−7, 1) and (−4, −8). Write its equation in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.

68 of 70 AA.9 Write a linear equation from two points 2R9

Question

A line passes through the points (−1, 10) and (4, −10). Write its equation in slope-intercept form.

Write your answer using integers, proper fractions, and improper fractions in simplest form.
